AMERIMIX Colored Mortar

AMERIMIX mortar colors are available in 54 colors all formulated to complement or accentuate the range of colors found in brick, stone and colored concrete block.

The colors depicted on this color chart provide an approximate representation of applied material. They are to be used as a guideline only. Natural variations in cement, changing job site conditions, weather, application and finishing techniques and curing procedures will affect the final color and appearance. AMERIMIX recommends doing a sample with actual job site materials before making a final color decision.
